MAKE-UP PENCIL (04-2001)

Is safe for human health and has been evaluated on the basis of the formula supplied by the manufacturer:

- the ingredients used including the presence of impurities.
- toxicological relevant substances.
- toxicological profile of the ingredients used, taking into consideration the presence of possible impurities.
- interaction between the raw materials used.
- quantities of weight and volume exposed to the consumer.
- foreseeable [improper use](#) by the consumer-group.

Produced within the European community.

MAKE-UP PENCIL (01-2002)

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med Werner Voß
